

UCL

Young Scientists Needed!

We are looking for **children aged 8-11** to understand how being motivated affects learning.

We are looking for children **with** and **without** language challenges (e.g., DLD, speaking and listening challenges, some children with dyslexia, some autistic children). A diagnosis is not necessary.

-Study **Session 1** is ~1hr and can be done *in* the child's home, *at* UCL, *online* if preferred, or *in school* (if school permits).

-Study **Session 2** is ~1hr and will be done 1 week later.

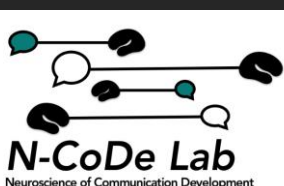

Children will receive **£10/ hour** and a **small prize** for participation.

Please click the link below to **fill our form**, so we know you are interested. This should only take **2-3 minutes**.
